MAKERSPACE Requirements

Large Format Printer

- Camera Ready Art i.e. photo in either .jpg, .gif, .tiff, or .png format on a flash drive. The image should have a resolution of at least 2000 or more pixels depending on the amount of enlargement required.

VHS to Digital Converter

- VHS tape(s) in good condition i.e. not jammed or torn (we can't repair tapes).
- A disc or flash drive to save the digitized tape to. If you do not have a disc we can sell you one for \$1.00. Note that a 2-hour tape will typically take a full DVD disc.

Cassette Music Tape to Digital Converter

- Cassette(s) in good condition i.e. not jammed or torn (we can't repair tapes).
- A disc or flash drive to save the digitized music to. We can provide a CD for \$1.00 if you need one.

LP Album to Digital Converter

- Bring in your 33 1/3 album along with a flash drive or CD to save it to. If you need a CD see above. Remember that the quality of the transfer will only be as good as the LP (i.e. scratches, pops and skips will be digitized).

Button Maker

- Camera Ready Art i.e. photo or artwork in either a .jpg, .gif, .tiff or .png format on a flash drive. The image doesn't have to be very large but remember it is going to go into a circle

so if the original is square, you may lose some of the image.

- There is a template via Word that you can use to make the circular artwork needed for the button. We can provide this for you at one of our computers.

T-Shirt Press

- Camera Ready Art i.e. photo in either .jpg, .gif, .tiff, or .png format.
- T-Shirt(s) that are mostly cotton. The more poly in the shirt the greater the chance of melt or image imperfections.
- If you are doing another item i.e. a tote bag, the same applies. If it has a rough texture, the image may look distressed or uneven in finish

Cameo Silhouette Cutter

- Camera Ready Art i.e. photo or artwork in either a .jpg, .gif, .tiff or .png format on a flash drive. The image doesn't have to be very large, but it must be large enough to fit whatever it is being transferred to (i.e. a mug, bag, shirt etc.) without pixilation.
- The item you are transferring the cut image to.
- If you are doing projects that require paper, and cutting, we have some cardstock but cannot guarantee that we have exactly what you need.
- Cardstock, vinyl and heat transfer vinyl sheets are available from the library at \$1.50 per sheet.

If patrons are uncertain about any aspect of the project they wish to do, please have them make a one-on-one appointment so we can sort out any issues prior to them coming to the library. Have them call 859.962.4071 to set-up an appointment.
