

Laminator -Step by Step Guide-

Step 1: Turn the power button on the back of the machine.

Then click the power button on the front until it beeps.

The beep lets you know that it's heating up.

Step 2: It's going to take several minutes to heat up.

When it beeps again, and the check mark is lit up on the machine it's ready to go.

Step 3: Hold down the slow button until you are finished laminating.

Step 4: Use the blade on the back to cut the lamination free from the machine.

Make sure your lamination is farther out than the blade.

Step 5: The laminator keeps track of how many feet have been laminated so you don't have to worry about measuring it.

Clear the measurements when finished.
